6.5 Electrical Characteristics

Specified at TJ = 25 C unless otherwise noted.

PARAMETER	TEST CONDITIONS		TYP	UNIT
Accuracy	VOUT >= 1.5 V	TJ = -40 to 125 C	1.5	%
	VOUT < 1.5 V		20	mV
Line regulation	VIN from 2 V to 6 V		5	mV
Ground current	IOUT = 0 mA, TJ = 25 C		25	nA
	IOUT = 0 mA, TJ = 85 C		60	

6.6 Timing Requirements

PARAMETER	MIN	MAX	UNIT
Startup time	200	500	us
Enable delay	10	40	us
Shutdown time	less than 1 ms		ms

7 Detailed Description

The device keeps quiescent current below 25 nA. When VOUT < 1.5 V the accuracy is specified in millivolts rather than percent.
